OVERVIEW

Adams County Indicators Summary provides data demonstrating the health status of Adams County residents and some individual risk behaviors that contribute to health outcomes. The indicators in this report are used to monitor the population's health and are updated as new data becomes available.

Adams County Indicators Summary demonstrates changes within Adams County over time and, when available, make comparisons between Adams County, Washington State, and the United States. Additionally, lower socioeconomic status is often associated with poorer health outcomes. When available and appropriate, health indicators were analyzed by age, sex, race, education, and income to identify disparities.

The information in this document provides the community and local agencies information on health issues and affected populations. The information may help direct health and social interventions to areas of greatest need and build support for health policies, as well as educate the public, community organizations, and policymakers on the community's health and well-being.

Up-to-date data, reports, and other information can be found at countyhealthinsights.org/county/adams.
